

MANAGEMENT OF ICP

- Brain Trauma Foundation
 - Monitor ICP in severe TBI [to reduce in hospital and 2 week post injury mortality]
 - Treat ICP $>22\text{mmHg}$
 - Maintain CPP 60-70mmHg

TREATMENT

- Hyperosmolar therapy - mannitol 0.25g-1g/kg, hypertonic saline eg. 2ml/kg of 5% HS
- Barbiturates for refractory ICP
- Therapeutic hypothermia
